

You may notice that this is the second time you've received an annual report from iSPACE in 2018. That's because we've changed our fiscal year to September 1 through August 31, to better match with the financial cycles of our customers.

But, regardless of our fiscal year timing, we'll still be bringing the same outstanding programs to our clients as always!!

In 2018, thanks to the generosity of partners like you, we expanded our goal to offer programs for underserved students providing:

>130
subsidized programs
to low-income classes
during the 2017-18 school year

46
"camperships"
to enable low-income students
to attend 2018 summer camps

Multiple programs to
get girls excited about
STEM,
including a week-long
summer camp

And, we plan to do even more in 2018/19.

While we have always believed the impact of our programs was substantial, we have learned it is even more so for underserved students. A teacher who recently brought her class to iSPACE expressed it this way -

“ Experiences like these are not the norm for our students – but I was super impressed as I watched them embrace the growth mindset ... The exposure to the various jobs was beyond anything that I could have dreamed. So often the "free" programming is less substantial than what we as educators would hope for- but not with iSPACE! Thank you so much for finding organizations that can help provide these amazing opportunities – and thank you ... for everything thing that your team did to make our students feel loved, smart, and worth the investment! ”

With your help, we will continue to make the investment in the next generation of STEM professionals!

31,700 students served
2017/18 school year

46 camperships
awarded

54 corporate
partners
